

Mindsteam Software

November 1st, 2008

Mindsteam Software announces **MindSpell** 1.0 for Adobe InDesign® and Adobe InCopy®. Supports both Creative Suite® 3 (CS3) and 4 (CS4).

MindSpell provides spell checking support for over 100 unique languages as well as support for additional locale variants. Unable to find support for your language in InDesign? Is InDesign's speller not robust enough?

Add **MindSpell** to InDesign or InCopy to create a truly global editing solution.

MindSpell leverages 3 different spelling services to provide the most complete multilingual spell checking solution for your business or multi-language project. Simply enable your preferred spelling service(s) in the **MindSpell** preferences panel, and install the individual language data folders into the appropriate spelling service folder. **MindSpell** automatically generates the InDesign languages based on the data folders

installed. You can then apply your new language to text in InDesign and check spelling via InDesign's Check Spelling dialog, or use the Dynamic Spelling feature.

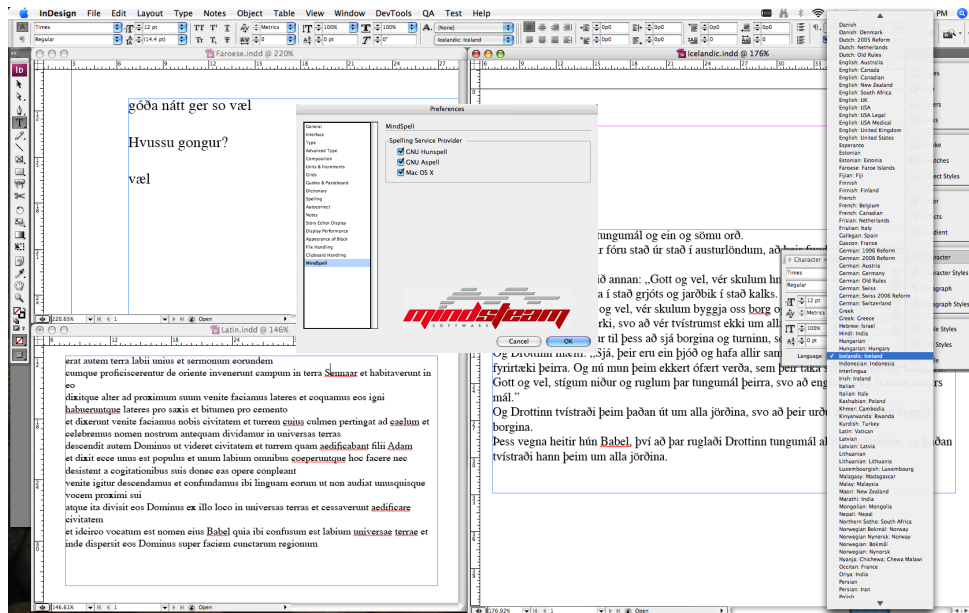

Best of all, there is no need to purchase individual languages separately, all languages are supported in one version! See the table below to see if your language is supported.

For more information visit www.mindsteam.com or e-mail info@mindsteam.com.
